to the People!**

**Empowering
Communities to
become
Manufacturers
in their own right.**

ROCLA SANITATION'S

Thuthukisa Initiative

Our Vision:

To boldly empower local communities, entrepreneurs, contractors and SMME's to become manufacturers and suppliers of the most innovative and highest quality toilet structures in all of Africa.

Our Mission:

To enhance the quality of life of entire communities through innovative engineering that allows them to manufacture high quality toilet structures.

“Thuthukisa” - let's develop and improve by...

- Empowering communities/SMME's to become manufacturers.
- Broad based local employment and community participation.
- Helping communities and SMME's acquire skills, enabling them to overcome challenging circumstances and become valuable contributors to their families and communities.
- Removing the capital requirement for the establishment of a manufacturing facility, no matter the project size.
- Simplified production and installation techniques, allowing for quality products manufactured and erected from day one.
- Environmentally friendly recycling of waste materials into practical items for everyday use within the local community.
- Using Rocla's product quality standards & design innovations.

ABOUT ROCLA

Rocla (Pty) Ltd is Southern Africa's leading manufacturer of precast concrete products for infrastructure, including pipes, culverts, manholes, poles and various other related products with an extensive network of factories throughout South Africa, Namibia and Botswana. Rocla can design and manufacture special products tailored to customer requirements through the technical expertise and quality controls the company has in place after over 99 years experience in the pre-cast concrete field.

QUALITY: Rocla is ISO 9001/2008 certified and has the applicable SANS mark on the bulk of its products. The SABS guidelines for product quality and production processes are adhered to, and where possible, the "Standardization Mark" will be applied to the products. Rocla is fully committed to the principal of Total Quality Management and has a sophisticated Quality Management System, which is considered key to all that the company stands for and for all its endeavours into the future. The system is continually monitored and upgraded to ensure its effectiveness.

PROCUREMENT: Procurement forms part of Rocla's Quality Management System. It is important for the company to establish supplier relationships to ensure consistent quality of supply. The company strives to source material and services from BEE companies where possible.

Rocla Sanitation through its Thuthukisa Initiative has designed, developed and patented the “Community Cast” system to boldly empower Communities to become Manufacturers in their own right.

“Community Cast” – Taking the Factory to the People

Innovative quality products from a quality company that looks after its people, clients and now also the local communities and entrepreneurs - [Rocla \(Pty\) Ltd](#)
